

CONTENTS

Food Technology

Teresa Banaszekiewicz, Agnieszka Bialek, Andrzej Tokarz, Karol Kaszperuk

Effect of dietary grape and pomegranate seed oil on the post-slaughter value and physicochemical properties of muscles of broiler chickens 199

Javad Mottaghipisheh, Mehdi Ayanmanesh, Ramin Babadayei-Samani, Alireza Javid, Mina Sanaeifard, Sara Vitalini, Marcello Iriti

Total anthocyanin, flavonoid, polyphenol and tannin contents of seven pomegranate cultivars grown in Iran 211

Mohammad Nikkhahi, Effat Souri, Parisa Sarkhail, Maryam Baeeri, Negar Mohammadhosseini

Evaluation of anti-tyrosinase activity of *Allium ursinum* extracts and their metal complexes 219

Paulina Pauter, Maria Róžańska, Paulina Wiza, Sandra Dworczak, Natalia Grobelna, Paulina Sarbak, Przemysław Ł. Kowalczewski

Effects of the replacement of wheat flour with cricket powder on the characteristics of muffins 227

Marwa M. El-Said, Tamer M. El-Messery, Hala M. F. El-Din

The encapsulation of powdered doum extract in liposomes and its application in yoghurt 235

Katarzyna Szajnar, Agata Znamierowska, Dorota Kalicka, Piotr Kuźniar, Dorota Najgebauer-Lejko

Quality of yogurt fortified with magnesium lactate 247

Guowei Shu, Sha Mei, Qian Zhang, Ni Xin, He Chen

Application of the Plackett-Burman design to determine the main factors affecting the anti-oxidative activity of goat's milk casein hydrolyzed by Alcalase and papain 257

Kawther El-Shafei, Fouad Mahmoud Fouad Elshaghabee, Hoda Samir El-Sayed, Jihan Mohamed Kassem

Assessment the viability properties of *Lactobacillus casei* strain using labneh as a carrier 267

Human Nutrition

Aoxue Lu, Menggen Yu, Meng Shen, Zhiyu Fang, Yaoyao Xu, Shuang Wang, Yongjun Zhang, Weimin Wang

Antioxidant and anti-diabetic effects of *Auricularia auricular* polysaccharides and their degradation by artificial gastrointestinal digestion – Bioactivity of *Auricularia auricular* polysaccharides and their hydrolysates 277

Amani M. D. El-Mesallamy, Seham A. Mahmoud, Khalid M. Elazab, Sahar A. M. Hussein, Abdelaziz M. Hussein

Attenuation of metabolic dysfunctions in the skeletal muscles of type 1 diabetic rats by *Stevia rebaudiana* extracts, via AMPK upregulation and antioxidant activities 289
